“The university creating knowledge and value”
Recep Tayyip Erdoğan University was founded within the framework of the law issued on 17 March 2006 as Rize University, but with another law issued on 11 April 2012, it was renamed as “Recep Tayyip Erdoğan University”.

The university’s roots in Rize date back to 1 March 1976 when Rize Vocational School was founded. In 1992, the first faculties in our province, Rize Faculty of Theology and Rize Faculty of Fisheries were founded. They were followed by Fındıklı Vocational School (1996), Faculty of Education (1997), and Faculty of Arts and Sciences (1997). Eventually, the university was founded in 2006.

Our university is made up of the following units: Ardeşen Faculty of Tourism, Faculty of Agriculture and Natural Sciences, Faculty of Arts and Sciences, Faculty of Dentistry, Faculty of Economics and Administrative Sciences, Faculty of Education, Faculty of Engineering, Faculty of Fine Arts, Design and Architecture, Faculty of Fisheries, Faculty of Medicine, Faculty of Theology, Maritime Faculty, Fındıklı School of Applied Sciences, Güneysu School of Physical Therapy and Rehabilitation, School of Foreign Languages, School of Health Sciences, School of Physical Education and Sports, Ardeşen Vocational School, Fındıklı Vocational School, Vocational School of Health Services, Vocational School of Justice, Vocational School of Social Sciences, Vocational School of Technical Sciences, Pazar Vocational School, Institute of Health Sciences, Institute of Natural and Applied Sciences, and Institute of Social Sciences.

Founded in 2006, Recep Tayyip Erdoğan University has come to an important position in its 10th year in terms of physical conditions, the quality of education, and research and development infrastructure. Growing qualitatively and quantitatively, our university has come 4th amongst the universities founded after 2000 in Turkey and 50th among all universities in Turkey with regard to academic performance and success.

As its slogan “The University Creating Knowledge and Value” suggests, Recep Tayyip Erdoğan University is gradually developing with the works and projects to become an international university and to help its students, the society, the country, and humanity. Being an international university, providing high quality, and serving for the society are some of our main objectives. As a requisite of this mission, our university has been in an endeavor to fulfill its duty in the best way since its foundation.

I express my gratitude to our President Dear Recep Tayyip ERDOĞAN, the politicians of our province, members of the Recep Tayyip Erdoğan University Development Foundation, all of the institutions and organizations that provide their full support to our university, and all the academic and administrative staff of Recep Tayyip Erdoğan University for their great contribution to our university to reach its goals.
ACADEMIC UNITS

FACULTIES
- Ardeşen Faculty of Tourism
- Turgut Kiran Faculty of Maritime
- Faculty of Agriculture and Natural Sciences
- Faculty of Arts and Sciences
- Faculty of Dentistry
- Faculty of Economics and Administrative Sciences
- Faculty of Education
- Faculty of Engineering
- Faculty of Fine Arts, Design and Architecture
- Faculty of Fisheries
- Faculty of Law
- Faculty of Medicine
- Faculty of Theology

VOCAATIONAL SCHOOLS
- Ardeşen Vocational School
- Fındıklı Vocational School
- Vocational School of Health Services
- Vocational School of Justice
- Vocational School of Social Sciences
- Pazar Vocational School
- Vocational School of Technical Sciences

GRADUATE INSTITUTES
- Institute of Natural and Applied Sciences
- Institute of Social Sciences
- Institute of Health Sciences

SCHOOLS
- Fındıklı School of Applied Sciences
- Güneysu School of Physical Therapy and Rehabilitation
- School of Foreign Languages
- School of Health Sciences
- School of Physical Education and Sports
Our faculty possesses the mission to train qualified workforce for the tourism sector, which is quite important for our country's economy. The faculty provides every opportunity for student to put into practice what they acquired theoretically. Our faculty has not accepted any students yet.

Our faculty aims to grow up individuals who will drive our country in a competition with other countries, have a sense of responsibility, promote teamwork, update their knowledge, follow recent developments, and have necessary qualifications. Also, we aim to perform scientific studies, provide a good education and thus be a leading institution in the field.

Departments:
- Tourism Management

Turgut Kiran School of Maritime was established on 16 May 2009, and it was then renamed as Faculty of Maritime in 2016.

Our faculty is preferred by those who are interested in sea and navigation. Considering the requisites of the maritime sector, we, as Turgut Kiran Maritime Faculty, aim to educate our students to make sure that they are qualified enough to be employed all over the world, communicate well, think freely, embrace teamwork, and have adaptive and research skills.

Maritime sector is blooming nationally and locally as Turkey's economy is growing as well as the regional economy. Therefore, the graduates of our faculty can easily find job opportunities in Turkey and abroad.

Laboratories in Our Faculty: Shipping, Oil Pollution and Meteorological Laboratory, Computer Laboratory, Navigation, Map and Drawing Laboratory, Physics-Chemistry Laboratory.

Departments:
- Maritime Transportation and Management Engineering
Faculty of Dentistry was founded on November 15th, 2010, but accepted its first students in the 2013-2014 academic year. Serving as a polyclinic and providing education, our faculty aims to develop policies on education, service, research, and dental health; and to reach at an optimal level. Thus, raising qualified dentists by offering undergraduate and graduate programs, contribution to science with researches, and performing activities that are beneficial to the society are our priorities.

The mission of our faculty is to consider students’ and patients’ satisfaction, follow the advancements in the field, employ technology, make contributions to science and humanity, have an international fame, and facilitate the treatment of oral and dental health of the community.

The duration of undergraduate program in our faculty is 5 years. Here is the list of the programs offered:

**Departments:**
- Dentistry

Faculty of Education was founded on September 3rd, 1997. It raises teachers and academicians who internalize national and moral values, are lifelong learning oriented, meet the social, cultural and educational needs of the society.

Students in our faculty get theoretical and applied education. Students also make applications in different institutions for the education of the society. Moreover, all the student must spend for a certain amount of time doing internship at schools in their last year. Students and staff can apply national and international mobility programs such as ERASMUS (International Student and Staff Exchange Program), FARABI (National Student and Staff Exchange Program) and MEVLANA.

The laboratories in our faculty are: Physics Lab, Chemistry Lab, Science Lab and Computer Lab (2 units).

**Departments:**
- Computer Education and Educational Technology
- Secondary School Science and Mathematics Education
- Psychological Counseling and Guidance
- Primary Education
- Social Science Education
- Turkish Language Education
Faculty of Arts and Sciences was founded on September 3rd, 1997 and its first students graduated in 2002. Our faculty is an academic unit that makes information applied in new areas, regards education more than conveying knowledge, and teaches its students to adopt moral values, to think and criticize. It is highly important for our faculty that the academic staff and students must internalize the universal principles of basic sciences and have an international view.

The aim of Faculty of Arts and Sciences is to raise students who are able to fix problems using their analysis and synthesis skills, can link the sciences with daily life, keep up with the time and willing to learn permanently.

The laboratories in our faculty: Physics Laboratory (4 units), Biology Laboratory (3), Chemistry Laboratory (3), Organic Research Laboratory (2), Computer Laboratory (2), Analytical Chemistry Laboratory, Physical Chemistry Laboratory, Biochemistry Res. Laboratory, Inorganic Chemistry Laboratory, Laboratory of Molecular Biology, Botany Laboratory, Zoological Laboratory, Plant Physiology Laboratory, Micro Biology Laboratory, Solid State Physics Laboratory, Materials Laboratory, Atomic and Molecular Physics Laboratory, Electronics Laboratory, Biochemistry Laboratory.

Departments:
- Biology
- Georgian Language and Literature
- English Language and Literature
- Chemistry
- Mathematics
- History
- Turkish Language and Literature

Faculty of Fine Arts, Design and Architecture, established on June 23, 2012, accepted its initial students to the Department of Landscape Architecture in 2014-2015 academic year.

With the slogan of “From the depth of history, to the horizon of science and art”, our faculty aims to raise designers and architects who care individuals and the society, embrace such values as culture and art, think freely, have a high self-esteem, and are aware of the demands of their era.

Helping art to become efficient and widespread in the society, our faculty is also trying to be an international attraction in terms of cultural and artistic events.

Commitment to ethical and academic values, being innovative, progressive, delicate, liberal and intercultural are some of our values and priorities.

Departments:
- Landscape Architecture
Our faculty has not accepted students due to insufficiency of faculty members. As of today, our faculty has 19 research assistants who study their master’s and doctoral degrees in different universities across Turkey.

Faculty of Law, having a broad vision and being open to innovative approach, aims to train dynamic lawyers who are creative, think differently, contribute to the creation of legal regulations with knowledge and experience, beyond the classical, known legal information and ideas.

With a student-centered approach, we aim to raise individuals who have participative, inquisitive, analyzing, constructive and universal thinking skills. Another aim of the faculty is to serve to our country and humanity as a research and education center of law with an international reputation.

Our basic principle is to adopt such a contemporary approach that define lawyers have an active role in the regulation of the relationships among citizens and the institutions.

Faculty of Economics and Administrative Sciences was founded 28th November, 2007 and accepted students for Business Administration Department in the academic year 2009-2010.

The aim of the faculty is to raise individuals with a deep knowledge, advanced analytical thinking and research skills. The graduates are supposed to be equipped with effective communication skills.

Located in Zihni Derin campus, our faculty aims to publish distinctive books and articles using scientific methods and technology, and to initiate social service projects for the region and the society.

Our departments allow their students to choose courses in accordance with their objectives. With such a flexible structure, we try our best for our students to build their own future.

**Departments:**
- Economics
- Economics (Evening Education)
- Business Administration
- Business Administration (Evening Education)
- Political Sciences and Public Administration
- Social Work
Faculty of Theology was founded on July 3rd, 1992 and accepted students in the academic year 1993-1994.

The mission of our faculty is to raise theologians who produce information caring religious and universal values, following academic principles, and knowing the needs of the society. They are also supposed to be contemporary experts in their field, devoted themselves to improve, and to have a high self-esteem.

There are three departments in our faculty: “Basic Islamic Sciences”, “Philosophy and Religious Sciences”, and “Islamic History and Arts”. Our graduates can be employed as an imam or preacher by the Presidency of Religious Affairs. In addition, they can serve as a teacher of religion at public schools. We offer graduate programs for their further studies.

The duration of the education is 5 years including a year of Arabic preparation class.

Departments:
- Theology
- Theology (Evening Education)

Founded on April, 4, 2011, Faculty of Engineering received its first students for the departments of Geological Engineering and Energy Systems Engineering in the 2012-2013 academic year. Faculty of Engineering provides training with the aim of raising engineers who solve problems, use knowledge and technology, and have universal qualities; helping with the country’s technological advancement; and making contribution to science.

Our faculty aims to train creative engineers who are sensitive to the nature and environment, follow the technological developments, have internalized basic sciences, define the problems and find rational solutions, do research on basic and applied engineering in the national and international levels, use the produced knowledge for social benefit, have respect for human rights, and care ethical values.

The mission of the faculty is to be one step ahead among other national and international universities with the help of intense training programs, research and development activities, and opportunities provided for graduates.

Departments:
- Electrical and Electronics Engineering
- Energy Systems Engineering
- Civil Engineering
- Mechanical Engineering
Faculty of Fisheries was established on July 3rd, 1992 and accepted students in the 1993-1994 academic year.

Faculty of Fisheries is an institution raising engineers that can provide knowledge and technology for the growing aquaculture sector. The graduates of this faculty can be researchers at the universities of Turkey and also can be employed by the Ministry of Food, Agriculture and Livestock. Also, they have job opportunities in Turkey and abroad in private companies related to fisheries and aquaculture.

Our students have a chance to work and apply their knowledge as they are required to do internship for a certain time during their education.

Laboratories in our faculty: Microscope Laboratory, Hunting and Fishing Tools Tech. Laboratory, Computer Laboratory, Fish Diseases Laboratory, Water Chemistry Laboratory, Process Technology Laboratory, Molecular Biology and Genetics Laboratory, Histology and Age Determination Laboratory, Fisheries Biology Laboratory, Aquarium Lab (2), Fish Museum, Aquatic Toxicology Laboratory, Underwater Research Laboratory.

Departments:
• Fisheries Engineering

Faculty of Medicine was founded on March 1st, 2006 and accepted students in the academic year 2008-2009.

Defining its mission with “education”, “research” and “service”, our faculty develops its curriculum following the medical advancements in Turkey and the world.

It aims to be an internationally-recognized faculty contributing to medical sciences with the education it offers. Raising doctors and physicians who are aware of the health problem of our country and qualified enough to overcome them, innovative, social, respectful to human rights and meticulous about quality standards.

Our faculty is now among the prestigious medicine faculties in Turkey as it has been progressing since it was founded. The number of the academic staff here is adequate; and the physical conditions as well as the technological infrastructure is improving. As we accept a limited number of students, they have a chance to access our academic staff easily and benefit from them at an optimum level.

Departments:
• Medicine
Established on April, 16, 2012, Faculty of Agriculture and Natural Sciences received its first students in the 2013-2014 academic year.

Faculty of Agriculture and Natural Sciences, which aims to produce knowledge and use the produced knowledge for social and economic benefit, to save natural resources, and to become a reputable education institution in both national and international level, to make contribution to our country’s economic, social and cultural development.

Following the technological advancements in modern agriculture and providing solutions for the agricultural problems of the region and Turkey, our faculty encourages researches at universal level in terms of reclaiming, growing, and evaluating arable and horticultural plants.

It offers undergraduate and graduate programs with its qualified academic staff and executes researches for the agricultural policies.

The aim of our faculty is to raise highly-skilled, productive and entrepreneur individuals.

**Departments:**
- Horticulture
- Field Crops

Recep Tayyip Erdoğan University School of Physical Education and Sports, which aims to become a pioneering and leading institution competing with universities worldwide in the field of sport science and technology, runs contemporary physical and sport education programs.

The aim of our institution is to create a society constituting healthy individuals with a high quality of life and to train modern and high quality physical education teachers, trainers and sport managers who have universal values and are able to teach what they learn.

Another aim of our school is to popularize sports culture through the individuals who serve for national and international sports and for spending free time in a productive way.

It is also aimed to improve our students’ intelligence and competence at the maximum level, provide them with contemporary knowledge, competence and behaviors, educate students in an environment enabling them to achieve their full potential, and become an outstanding and exemplary institution which train individuals with contemporary field-specific approaches.

**Departments:**
- Sports Management
Founded in 2012, our school received its first students to the department of Banking and Finance in the academic year 2012-2013. Our mission is to serve as a bridge between qualified labor force and features required by industry, train qualified individuals and provide quality education.

Department of Banking and Finance aims to provide the courses related to marketing applications through internship and practical education, besides theoretical training through the courses such as mathematics, statistics, basic law, banking law, computing, accountancy, finance, computer finance analysis, risk management, financial instruments and institutions, investment project evaluation, and international financing.

Our students will develop themselves and become individuals who are leader in the community, sensitive to environment and have public consciousness.

Departments:
- Banking and Finance
- International Trade and Logistics

Güneysu School of Physical Therapy and Rehabilitation was founded on December 7, 2009. According to the State Institute of Statistics, disabled individuals currently comprise 12.29 percent of the total population of Turkey. Taking into account this fact, it can be said that our school whose graduates will work as physiotherapists has quite importance as it will contribute to employment in this field.

We aim to educate specialized medical professionals providing physical therapy for individuals with innate or acquired physical disabilities to reintroduce them to society and help them regain their functions as far as possible.

The mission of the Department of Physical Therapy and Rehabilitation is to train knowledgeable and skillful physiotherapists who are sensible to any changes that may affect human health, who have professional standards to supply care services to individuals, and who are able to fulfil their duties as effective members of healthcare team.

Public services are supplied by contemporary physiotherapists who have become skillful at their profession at the end of the four-year training. The Department of Physical Therapy and Rehabilitation started to treat patients in 2015-2016.

Departments:
- Physiotherapy and Rehabilitation
School of Health Sciences was founded on July 11, 2007. The school at the level of bachelor degree aims to train knowledgeable and effective healthcare personnel for community health services in accordance with the sense of modern education and scientific and technological developments. Our mission is to raise qualified employees and trainers who have theoretical knowledge, practical skills, and a great sense of leadership to protect, maintain and improve health of individuals, families, and all members of the public.

Our students are expected to have the mentality of a researcher. For this purpose, they are provided with professional courses integrated with practices. The curriculum of our school was prepared with the purpose of enabling students to get knowledge of human sciences and physical, social, medical and biological sciences best.

The graduates can work at state and private university hospitals, private hospitals, healthcare organizations, and schools.

Departments:
- Nursing

The School of Foreign Languages regulates compulsory and optional foreign language courses, foreign language preparatory classes except for faculty of theology, foreign language proficiency tests, and language courses. The school carries on its activities at Mahmut Hantal Education Building in Iyidere district.

Our school encourages students to improve their academic reading, writing and speaking skills and to use these skills in their future professional lives. Also, we aim to help students gain these skills through student-centered, creative, and critical thinking methods instead of traditional teaching methods. Our vision is to follow scientific and technological developments required for modern foreign language education in accordance with international standards.

Our mission is to train responsible and self-reliant individuals who are able to communicate confidently during their educational lives with the help of knowledge and skills they gain. Within this framework, the purpose of language training program is to provide students with language skills and to raise them as productive individuals having a competitive capacity at both national and international level.
The Vocational School of Justice, established in 2012, received 31 students to the department of Justice in the academic year 2013-2014.

The school was founded with the purpose of training qualified employees having basic knowledge and practical experience in law required by the judicial institutions. Thanks to our education programs, we aim to help students become individuals who are aware of Turkish judicial system; have the ability to interpret and evaluate texts about basic law at the minimum level; have the skill of analytical thinking; adopt such principles as democracy, secularism, social state, and superiority of law; respect different cultures, beliefs, life-styles and ways of thinking; appreciate the importance of life-long learning; and follow the developments in science, technology, and contemporary issues.

Our mission is to provide education that will prepare our graduates to be high performance professionals, who are knowledgeable about local and international justice practices, who can speak foreign languages and work in most prestigious law firms, private sector, as well as within justice bureaucracy.

Departments:
- Law
- Law (Evening Education)

Ardeşen Vocational School, founded on January, 24, 2003, helps students to gain theoretical and practical professional skills using the current education techniques with the aim of meeting the need of various organizations and institutions for qualified intermediate staff.

We aim to raise individuals well equipped for professional life by providing classrooms and laboratories having all technological facilities. The Vocational School has 21 academic personnel and 502 students. Our mission is to become a leading vocational school which provides an appropriate work environment for academic and administrative personnel and trains well qualified professionals in every aspect. Ardeşen Vocational School has an important role in providing skilled labor, besides enabling our graduates to get the position in the business world they deserve.

Departments:
- Banking and Insurance
- Computer Programming
- Computer Programming (Evening Education)
- Tourism and Hotel Management
- Tourism and Travel Services
Vocational School of Health Services was founded on July 11, 2007. Our school aims to meet the need for allied health personnel. To be more precise, our objective is to raise modern, intellectual, co-operative, knowledgeable, and skillful health technicians who have internalized the principles of total quality management, who are aware of their duties and responsibilities to their country, and who will be able to give service in accordance with both national and international standards.

Our mission is to become an educational institution which continuously follows the current affairs and professional changes to maximize the quality of education and which ranks first among the students’ preferences.

**Departments:**
- Anesthesia
- First and Emergency Aid
- Medical Laboratory Techniques
- Elder Care
- Physiotherapy

Pazar Vocational School, established on March 31, 2008, started to receive its first students in the academic year 2009-2010. The vocational school mostly specialized in the field of agriculture and cultivation has two active programs: Organic Agriculture and Medical and Aromatic Plants.

We aim to provide feasibility of organic agriculture, which has become a very important sector in Turkey and other countries, through modern methods in the region. It is also aimed to increase locals’ awareness of medical and aromatic plants that have become popularized in recent years.

Our mission is to become an exemplary and leading educational institution which is preferred nationally and internationally and which contributes to the economic and social development of the region.

**Departments:**
- Organic Farming
- Medicinal and Aromatic Plants
Vocational School of Technical Sciences was founded on March, 1, 1976. Its former name was Rize Vocational School. The land in At Meydani District was bought in 1986 and the school received its first students in 1992.

The aim of our school is to raise experts and executives who will be able to keep pace with the technological progress and rapidly changing socioeconomic conditions, and who have the quality the job requires.

Our mission is to train individuals who are productive, investigative, self-confident, respectful of social values, contributing to social and cultural life, and who have professional knowledge and skills and to accelerate the development process by producing new projects in collaboration with other industry stakeholders.

Laboratories in our school are as the follows: Computer Lab (6 units), Construction Laboratory, Air Conditioning and Refrigeration Laboratory.

Departments:
- Tea Production and Processing Technologies
- Electricity
- Electronic Technology
- Gas and Installation Technology
- Traditional Handicrafts
- Air Conditioning and Refrigeration Technology
- Construction Technology
- Construction Technology (Evening Education)
- Chemical Technology
- Machinery
- Machinery (Evening Education)
- Machinery, Arts, Construction
- Mechatronics
- Furniture and Decoration
- Automotive Technologies
- Textile Technologies
- Building Controls

Although the school previously had various departments and programs, it now has four programs according to the new regulation of Vocational Schools.

Departments:
- Office Management and Secretary
- Office Management and Secretary (Evening Education)
- Foreign Trade
- Foreign Trade (Evening Education)
- Public Relations and Advertising
- Business Administration
- Business Administration (Evening Education)
- Accounting and Taxation
- Accounting and Taxation (Evening Education)
- Logistics
Institute of Natural and Applied Sciences was founded with the aim of making contribution to universal and contemporary development in the fields of science and engineering and raising scientists and specialists who are able to conduct scientific and technological studies.

Our institute contributes to solving problems in public and private sectors, provides qualified personnel for our university and other higher education institutions, and plays an important role in many projects carried out to provide solutions to the problems of the region and country.

**Master Degree Programs:**
- Biology
- Energy Systems Engineering
- Science Education
- Physics
- Civil Engineering
- Geological Engineering
- Chemistry
- Mechanical Engineering
- Mathematics
- Fisheries

**Doctoral Degree Programs:**
- Biology
- Physics
- Chemistry
- Fisheries
- Science Education

Institute of Health Sciences was established on March, 1, 2006. Our institute offers graduate education in the fields of medicine and health sciences. We aim to help our students become individuals who are able to research independently and interpret scientific issues from a broad and profound point of view.

Students can get a master’s degree in two programs. The institute will soon start to receive students for master’s and doctoral programs and raise qualified individuals who are able to provide people with health service.

**Master Degree Programs:**
- Medical Biochemistry
- Medical Microbiology
- Physical Training and Sports
- Medical Biology

**Doctoral Degree Programs:**
- Medical Microbiology
- Histology and Embryology (joint program with Atatürk University)
Institute of Social Sciences was founded to organize, carry out and monitor graduate programs. The institute aims to strengthen theoretical background through courses, theses, and projects; to offer solutions to the problems that can be encountered in today’s social life with the contributions towards practice; and to raise qualified and effective academicians. In accordance with this purpose, we help our students become sociable and enterprising individuals who have critical and analytic thinking skills, produce creative ideas, have a sense of leadership even in a difficult situation, and have ethical values and a reliable formation.

As a research institution, Institute of Social Sciences has a mission to carry out scientific activities which will produce universal knowledge. Besides, as an education institution, it has a mission to provide its students with knowledge and skills at the international level, to enable them to creatively use contemporary scientific knowledge, and consequently to build a society that has adopted this understanding as a principle. To reach this objective, the institute is determined to maintain training services, scientific research and practices to reach perfection.

**Master Degree Programs with thesis:**
- Educational Administration, Supervision, Planning and Economics
- Philosophy and Religious Sciences
- Economics
- Islamic History and Arts
- Business Administration
- Primary Education
- Basic Islamic Sciences
- Turkish Language and Literature
- Social Sciences Education

**Master Degree Programs without thesis:**
- Business Administration (evening program)
- Economics (evening program)
- Local Governments and Decentralization

**Doctoral Degree Programs:**
- Philosophy and Religious Sciences
- Basic Islamic Sciences
- Turkish Language and Literature
- Business Administration

**Research and Application Centers**
- Assessment and Evaluation Application and Research Center
- Black Sea Strategic Application and Research Center
- Blueberry Application and Research Center
- Career Development Application and Research Center
- Central Research Laboratory Application and Research Center
- Continuing Education Research and Application Center
- Distance Learning Application and Research Center
- Fisheries Application and Research Center
- Health Application and Research Center
- Plant and Soil Application and Research Center
- Psychological Counseling and Guidance Application and Research Center
- Turkish Language Teaching Application and Research Center
STUDENT EXCHANGE PROGRAMS

Recep Tayyip Erdoğan University has student exchange programs (Erasmus, Farabi, Mevlana) within the framework of the bilateral agreements established between our university and other national or international universities. The students, who wish to study at another university through an exchange program, are responsible for the courses taken in the partner university. The credits students get from these courses are fully recognized at Recep Tayyip Erdoğan University according to the principles of “Regulation for Associate and Undergraduate Degree Education and Examinations”. Our university complies with Bologna System, and uses ECTS. The credits are also recorded in students’ documents of transcript of records and diploma supplements.

The principles of this regulation are also valid for the students coming from partner universities through exchange programs, and these students receive a transcript of records from Recep Tayyip Erdoğan University.

Our university offers an academic environment complying with international standards. International students can have these facilities for one academic year as part of Erasmus and Mevlana Exchange Programs.
